

FastPhite High K

Crop Safety:

The FastPhite range has been tested on a wide variety of crops in a variety of growing situations and has shown excellent crop safety. As with all new products, however, it is a wise precaution to test crop reaction on a small scale before making large scale applications onto growing crops.

Tank Mixing:

The FastPhite Range is physically compatible with most pesticides. Check by mixing a small amount in the correct ratio adding the product to the water followed by pesticide. Crops can be susceptible to scorch from mixtures of The Fast-Phite Range and pesticides applied during periods of stress.

Precautions:

Avoid spraying during high temperatures and bright sunlight. Keep out of reach of children, avoid contact with skin, eyes or clothing. Wash exposed area with water. The freezing temperature for this product is 0°C.
